

Latest targeted measurements

Gray: baseline. Blue: lower after-time. Brown: higher after-time. Median milliseconds.

WORKLOAD	RELATIVE TIME	BEFORE ms	AFTER ms	CHANGE
Top-bar progress / 1,000 calls		0.003675	0.002907	-20.91%
Sidebar progress / 1,000 calls		0.003517	0.002747	-21.89%
Command bar / hidden preparation		3.243	1.062	-67.26%
Find bar / open + close		3.818	3.763	-1.46%
Compact / scroll tabs		0.500813	0.472979	-5.56%
Top bar / scroll tabs		0.580188	0.521062	-10.19%

Progress, command and Find: pre-fix working tree vs accepted five-path fixes; 400 pairs per row.
Compact: archived comparison baseline vs final compact fix; 160 samples per version.
Top-bar scrolling: before/after label configurations; 100 pairs. Find speedup remains inconclusive.

Browser actions (1/2)

Gray: baseline. Blue: lower after-time. Brown: higher after-time. Median milliseconds.

WORKLOAD	RELATIVE TIME	BEFORE ms	AFTER ms	CHANGE
Warm session restore / 200 tabs		0.443438	0.443604	+0.04%
Address-bar typing / 20k history		42.984	9.500	-77.90%
Local page loading		10.573	6.170	-41.65%
WebKit scroll script round trip		1.214	1.057	-12.89%
Window resizing		4.505	3.733	-17.14%
Split-view resizing		5.635	2.070	-63.26%
Layout transition setup		10.285	9.172	-10.82%
Sidebar / switch tab		4.921	2.470	-49.81%
Sidebar / open + close tab		71.482	9.010	-87.40%
Sidebar / switch space		34.745	5.824	-83.24%

Original build vs current / four controlled groups / 28 samples per version
Baseline labels: Original build / Current build.
Latest recorded comparison for these workloads; retained from the preceding suite.

Browser actions (2/2)

Gray: baseline. Blue: lower after-time. Brown: higher after-time. Median milliseconds.

WORKLOAD	RELATIVE TIME	BEFORE ms	AFTER ms	CHANGE
Sidebar / scroll tabs		10.417	6.491	-37.69%
Top bar / switch tab		3.631	2.845	-21.65%
Top bar / open + close tab		13.187	9.753	-26.04%
Top bar / switch space		42.374	16.573	-60.89%
Compact / switch tab		6.307	4.160	-34.04%
Compact / open + close tab		15.965	12.690	-20.51%
Compact / switch space		43.134	17.631	-59.13%

Original build vs current / four controlled groups / 28 samples per version
Baseline labels: Original build / Current build.
Latest recorded comparison for these workloads; retained from the preceding suite.

History queries

Gray: baseline. Blue: lower after-time. Brown: higher after-time. Median milliseconds.

WORKLOAD	RELATIVE TIME	BEFORE ms	AFTER ms	CHANGE
1,000 entries / title		1.828	0.365292	-80.02%
1,000 entries / Unicode		2.023	0.531438	-73.73%
1,000 entries / no match		2.065	0.570812	-72.36%
1,000 entries / URL prefix		2.159	0.683396	-68.34%
20,000 entries / title		37.546	7.510	-80.00%
20,000 entries / Unicode		41.116	10.717	-73.94%
20,000 entries / no match		41.507	12.639	-69.55%
20,000 entries / URL prefix		45.145	14.811	-67.19%
20,000 entries / first query		37.381	31.762	-15.03%

Original build vs current / four controlled groups / 28 samples per version
Baseline labels: Original build / Current build.
Latest recorded comparison for these workloads; retained from the preceding suite.

Graphics & controls (1/2)

Gray: baseline. Blue: lower after-time. Brown: higher after-time. Median milliseconds.

WORKLOAD	RELATIVE TIME	BEFORE ms	AFTER ms	CHANGE
Command-bar rows / 100 refreshes		81.138	71.190	-12.26%
Compact tab refresh / 300 calls		2.224	1.821	-18.13%
Edge fades / 10,000 calls		0.921083	0.761625	-17.31%
Hover updates / 1,000 calls		4.257	2.954	-30.62%
Repeated symbols / 10,000 calls		1.457	1.328	-8.80%
Changing symbols / 1,000 calls		19.872	19.097	-3.90%
Tracking areas / 10,000 calls		1.843	1.574	-14.60%
Sidebar fallback icons / 1,000 calls		8.018	6.605	-17.62%
Sidebar supplied icons / 1,000 calls		8.057	6.675	-17.16%
Sidebar icon changes / 1,000 calls		20.094	16.761	-16.59%

Before this fix vs current / 90 samples per version; command-bar rows: 28
Baseline labels: Before this fix / Current build.
Latest recorded comparison for these workloads; retained from the preceding suite.

Graphics & controls (2/2)

Gray: baseline. Blue: lower after-time. Brown: higher after-time. Median milliseconds.

WORKLOAD	RELATIVE TIME	BEFORE ms	AFTER ms	CHANGE
Favorite fallback icons / 1,000 calls		1.356	1.141	-15.85%
Favorite supplied icons / 1,000 calls		1.387	1.149	-17.16%
Favorite icon changes / 1,000 calls		11.845	9.597	-18.98%
Extension fallback icons / 1,000 calls		0.580958	0.438625	-24.50%
Extension supplied icons / 1,000 calls		0.406562	0.317500	-21.91%
Extension icon changes / 1,000 calls		14.116	10.974	-22.26%

Before this fix vs current / 90 samples per version; command-bar rows: 28
Baseline labels: Before this fix / Current build.
Latest recorded comparison for these workloads; retained from the preceding suite.

Additional browser actions

Gray: baseline. Blue: lower after-time. Brown: higher after-time. Median milliseconds.

WORKLOAD	RELATIVE TIME	BEFORE ms	AFTER ms	CHANGE
Tab context menu / batched		0.020148	0.017959	-10.86%
Space context menu / batched		0.006651	0.005650	-15.06%
Spaces menu / batched		0.026279	0.025334	-3.60%
Pin + unpin tab		65.780	44.295	-32.66%
Favorite + unfavorite tab		64.214	8.496	-86.77%
Split / open, swap + separate		70.734	50.050	-29.24%
Settings / Appearance request		27.440	22.367	-18.49%
Settings / Layout request		33.205	30.994	-6.66%

Original build vs current / four controlled groups / 28 samples per version
Baseline labels: Original build / Current build.
Latest recorded comparison for these workloads; retained from the preceding suite.

Shared color resolution

Gray: baseline. Blue: lower after-time. Brown: higher after-time. Median milliseconds.

WORKLOAD	RELATIVE TIME	BEFORE ms	AFTER ms	CHANGE
Light appearance / 10,000 resolutions		13.186	6.891	-47.74%
Dark appearance / 10,000 resolutions		13.456	6.992	-48.04%
High-contrast light / 10,000 resolutions		13.500	6.939	-48.60%
High-contrast dark / 10,000 resolutions		13.464	7.094	-47.31%

Before this fix vs current / six alternating pairs / 90 samples per version
Baseline labels: Before this fix / Current build.
Latest recorded comparison for these workloads; retained from the preceding suite.

How to read these results

All 60 benchmark categories have scores. Each appears once, using its latest applicable recorded comparison.

The six targeted rows replace their superseded full-suite readings. The other 54 retain their previous results.

No best-run selection: higher readings and inconclusive outcomes remain visible.

Baselines and timing

Page 1 combines separately labelled targeted comparisons. Later pages retain their original suite baselines.

Browser/history scores compare original commit 550abac with the then-current optimized build.

Graphics/color scores compare their pre-fix baseline with the accepted fixes, as labelled on those pages.

These results were collected at different stages. They are not one fresh run of all 60 on the final code.

No tests were rerun for this PDF. No visible UI tests were launched.

Evidence and interpretation

Progress and command preparation improved in all four measured processes.

Compact improved by 5.56% overall; its separate 400-pair confirmation measured 6.77% lower median time.

Find measured 1.46% lower, but its interval crosses zero. A repeatable speedup is not established.

The final compact fix passed 359 native visual comparisons plus Release and Debug build checks.

Observed lower medians do not establish zero slowdowns for every run or live display frame pacing.
